

Testimonial for Avar & Company LLP by Clare Gradden Complete Drilling Services Limited

David McWhirter director of Complete Drilling Services Limited was first introduced to Ash Varma of Avar after receiving a CD business card from his previous involvement with a Web design company. He was extremely impressed by the Information Technological approach of Ash in ALL areas of his business and we decided to continue the dialogue.

About 10 months later, we approached Avar October 2004 for financial and business advice with Avar, as their approach was very helpful and professional.

Avar staff are extremely professional and courteous at all times they also show the up most respect at all times to Ash which in many companies is rare

We have found them trustworthy throughout the time we have been dealing with them.

Our company has gone through many troubled times and Avar have given us the knowledge and professional guidance to get through.

We have depended on Avar for the last 8 months and what they say they do.

There are no hidden agendas; all issues are transparent and explained fully.

Knowledge of accounting practice is immense and we have never seen results produced such as the ones received from Avar

IT-well what can we say-amazing I have never experienced the IT knowledge in my life as I have experienced at the offices of Avar. Ash and his team are "whiz kids"

Training and development is very apparent within the team at Avar.

I have myself received training organised by Ash and there is much more to come.

I hope that Ash and his team consider David & myself as friends, we certainly class them as friends (and Rita and Alick and Alicka)

One day we will invite them all round for a drink (when we have filled the hole in our dining room wall).

The only bad thing about Avar is the staircase up to the offices I may need a Stannah stair lift in years to come.

Humorous point **Ashok** Varma he has certainly shocked us with his knowledge and experience.

We would recommend Avar to anyone looking to change accountants- they have the full knowledge required to help you produce results.
